AVATARS REALM · WEBSITE UPDATE

Update 02
Change Report

A page-by-page summary of the Gen.G branding, contact-form and hero bracket updates applied to the Avatars Realm website, with before and after screenshots of every affected screen.

PROJECT	Avatars Realm Esports Academy & Gaming Arena
DOCUMENT	Avatars_Realm_Website_Copy___Journey — Kayleen (marked copy)
BRANCH	update-02
COMMITS	f526c77 · 7cd2888 · 0ecdf69
STATUS	Built, tested and pushed — not merged to production
DATE	11 November 2026

Prepared for Kayleen and the Avatars Realm team.

OVERVIEW

1 What changed in Update 02

Every item below was taken from the marked-up copy document and the follow-up notes. The existing theme, colours, fonts, layout and navigation are unchanged — the edits are targeted.

AREA	CHANGE
Home hero	Bright yellow brackets now frame “Train. Play. Compete. / Belong.”
Gen.G partner band	Moved up to sit directly below the hero buttons and made much larger, matching the reference lockup.
Contact form	New general contact form with Name, Surname, Email, Contact number, Subject, Message and consent. Every general contact button opens it in-page.
Phone number & email	Both removed from every page, including all `tel:` and `mailto:` links. Visitors reach the team only through the form.
“Email the team” / “Call”	Removed. The actions now open the contact form instead of an external mail application.
Game-interest form	Kept separate — “I’m Interested, Game On!” is unchanged in purpose and still lists games of interest.
Other pages	About, Academy Programmes, Memberships, Arena & Events, League – Tournaments – Events and FAQ all updated for the new contact route.

> **Deployment note.** The public URL `avatars-realm.vercel.app` is still serving an older build. The changes in this report exist on the `update-02` branch and need that branch’s Vercel preview — or a redeploy — before they appear publicly.

Verification

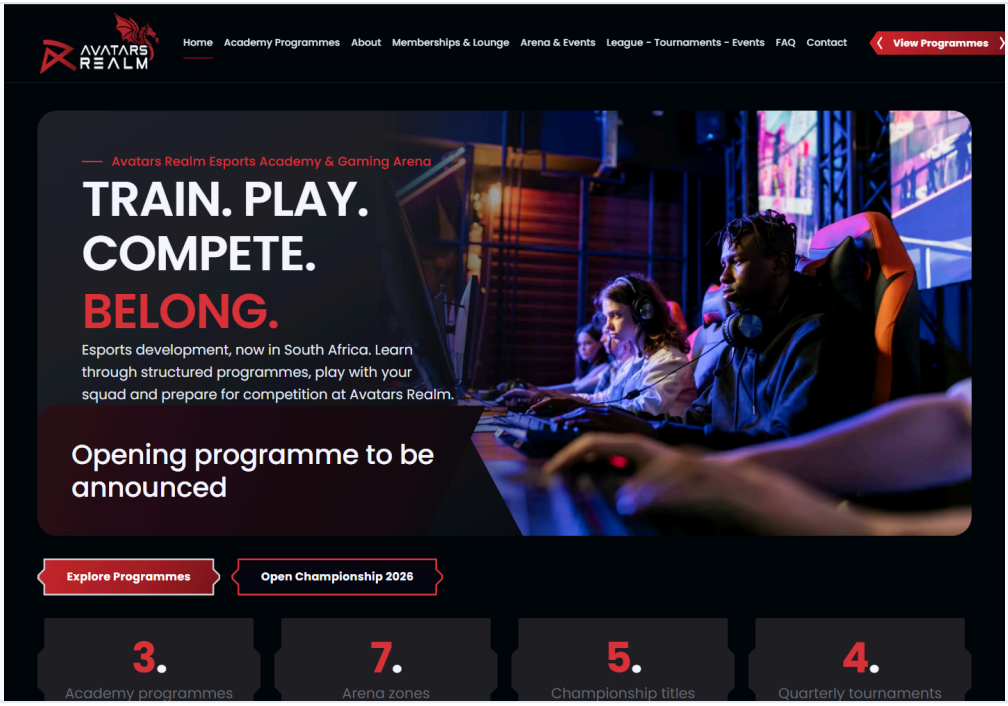

- ✓ `npm run typecheck` — passes
- ✓ `npm run lint` — passes
- ✓ `npm run build` — passes, all 8 public routes generated
- ✓ No email address, `mailto:`, `tel:` or `+27` phone number in any built page
- ✓ Contact form validated in-page and again on the server

HOME PAGE · CHANGE 2

2 Hero brackets

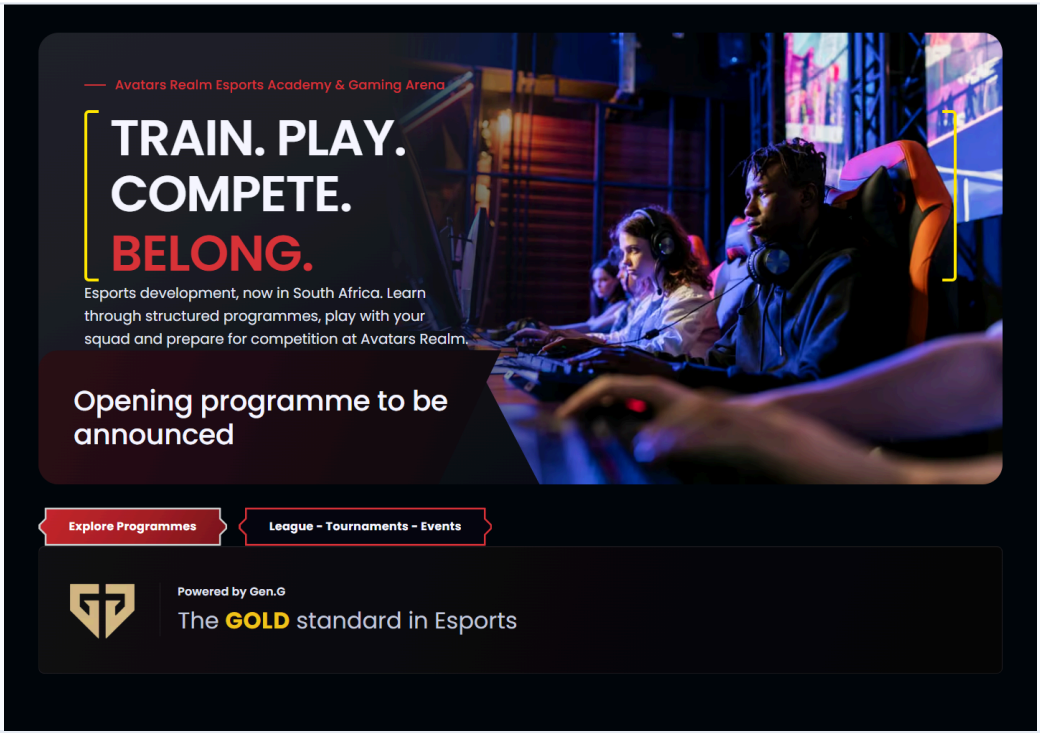

The yellow brackets in the reference were kept and strengthened: bright yellow, slightly rounded outer corners, enclosing both headline lines.

BEFORE — LIVE SITE

Old build: no brackets, four hero counters underneath the buttons.

AFTER — UPDATE-02

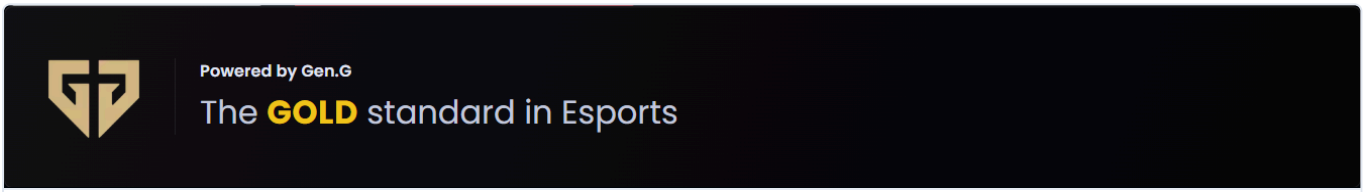

New hero: yellow brackets around “Train. Play. Compete. / Belong.”, Gen.G band underneath.

HOME PAGE · CHANGE 3

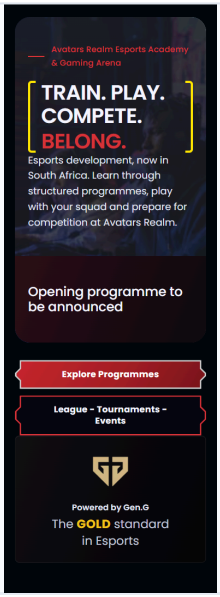

3 Gen.G partner band

The band was previously a slim strip below the hero and was too easy to miss. It now sits inside the hero, immediately under the two buttons and before “One destination, three ways in.”

PROPERTY	BEFORE	AFTER
Position	Separate strip after the hero	Directly below the hero buttons
Gen.G logo	48–56 px	80–112 px
“Powered by Gen.G”	0.9375 rem	0.9375–1 rem, gold divider
“The GOLD standard in Esports”	0.8125–0.875 rem	1.375–2 rem
Surface	Flat navy band	Near-black panel with gold edge

New Gen.G lockup: logo, gold divider, “Powered by Gen.G”, then the large GOLD tagline.

Mobile hero with brackets.

Mobile Gen.G band.

CONTACT · CHANGE 4

4 Contact form replaces email buttons

Visitors complete their enquiry on the site. No button opens an external mail application, and no phone number is published.

Fields on the general form

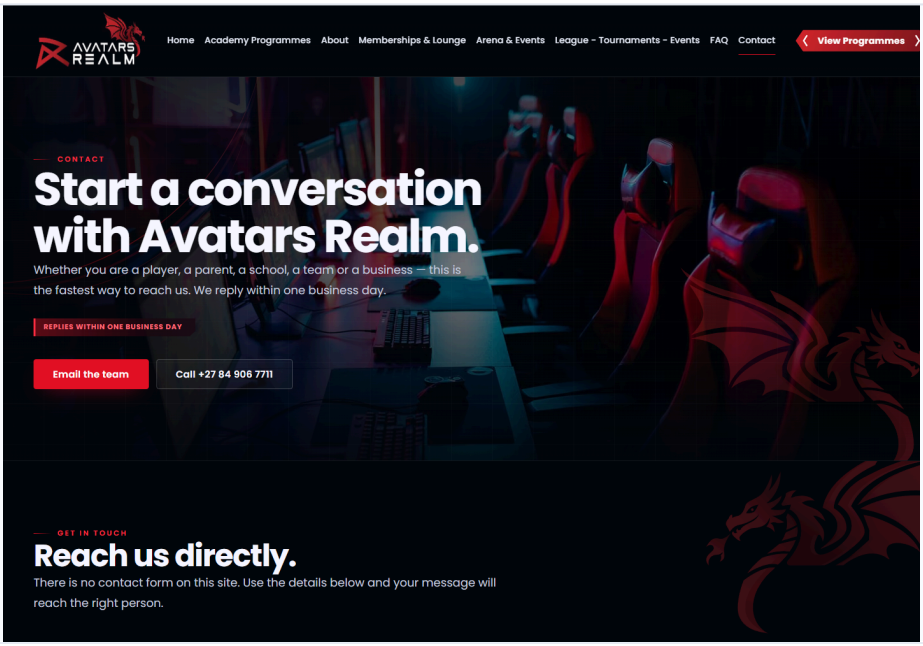

Name · Surname · Email · Contact number · Subject · Message (free text) · Consent checkbox

Subject choices: General enquiry · Academy programmes · Memberships & lounge · League, tournaments & events · Schools & groups · Partnerships · Other.

How it works

- The form validates in the browser, then again in `/api/contact`.
- The enquiry is delivered to the team's inbox using the provider already configured for the site (Web3Forms). The address itself is not published anywhere on the site.
- A hidden honeypot field and a per-IP rate limit reduce automated abuse.
- The reply goes back to the visitor's email address, so the team can answer directly.
- The same form appears inline on the Contact page and as a dialog from every other page.

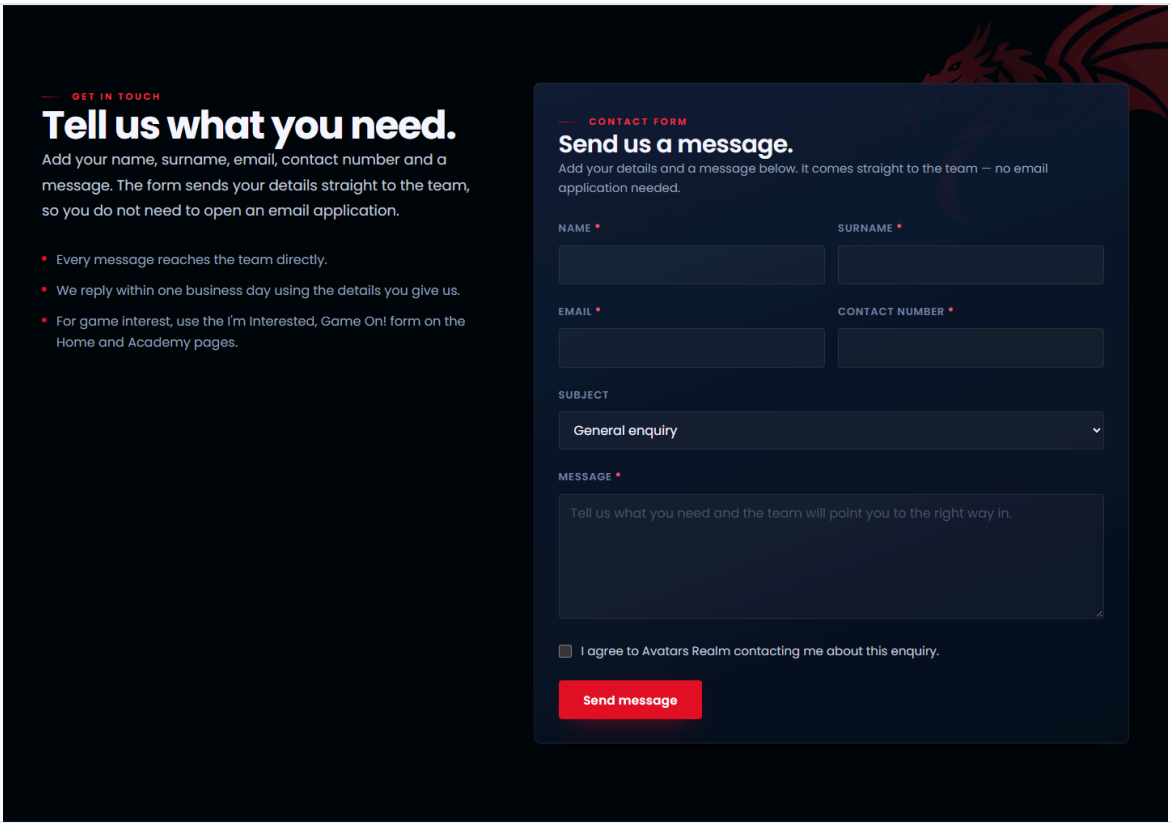

BEFORE — LIVE SITE

Old contact page: "Email the team" and "Call +27 84 906 7711" buttons, no form.

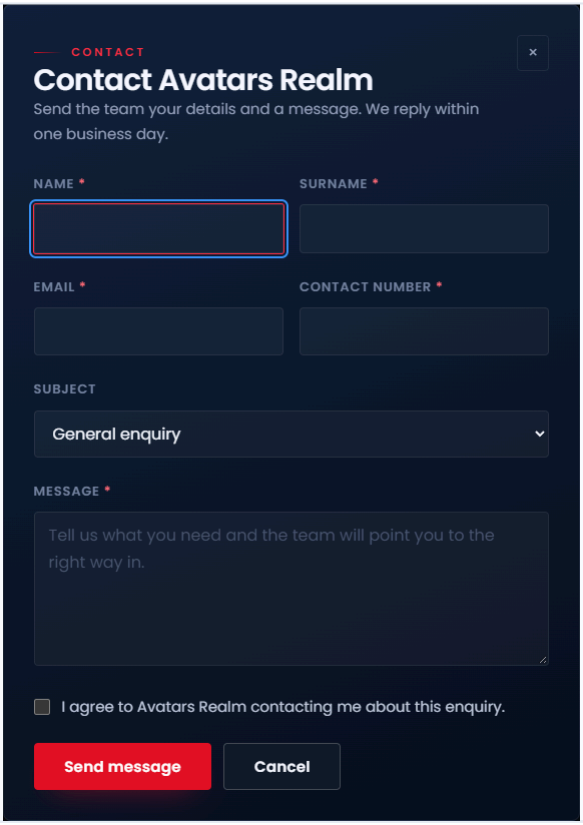

CONTACT · CHANGE 5

5 Contact page — after

Inline contact form on /contact/ — name, surname, email, contact number, subject, message and consent.

DIALOG FROM ANY CONTACT BUTTON

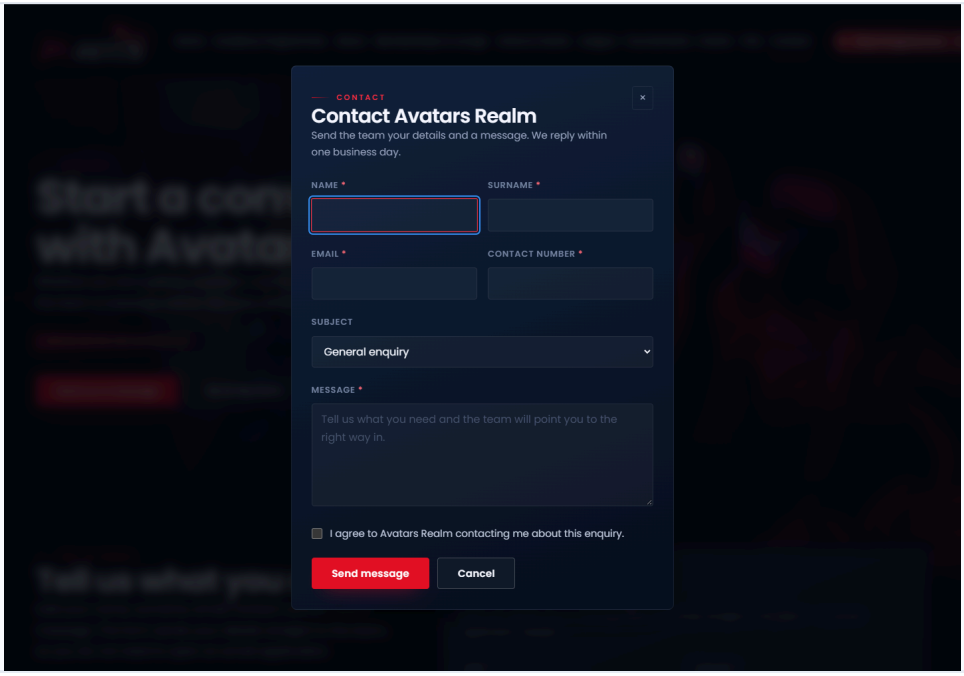

The same form opened as a dialog from a contact button elsewhere on the site.

CONTACT · CHANGE 6

6 Dialog now sits above the page

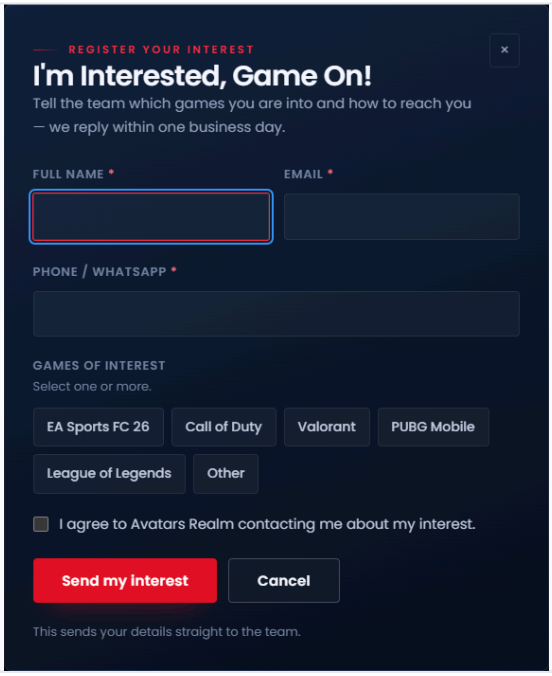

A stacking-context bug was found during testing: dialogs opened from the hero or CTA bands were being painted underneath later page sections. Both forms now render through a portal to the document body, so the dialog and its backdrop always cover the page.

Full viewport with the contact dialog open: backdrop dims the page and the form sits on top.

Game-interest form kept separate

“I’m Interested, Game On!” still collects full name, email, phone/WhatsApp, games of interest and consent. It was moved to the same portal so it also displays correctly.

The separate game-interest form, unchanged in purpose.

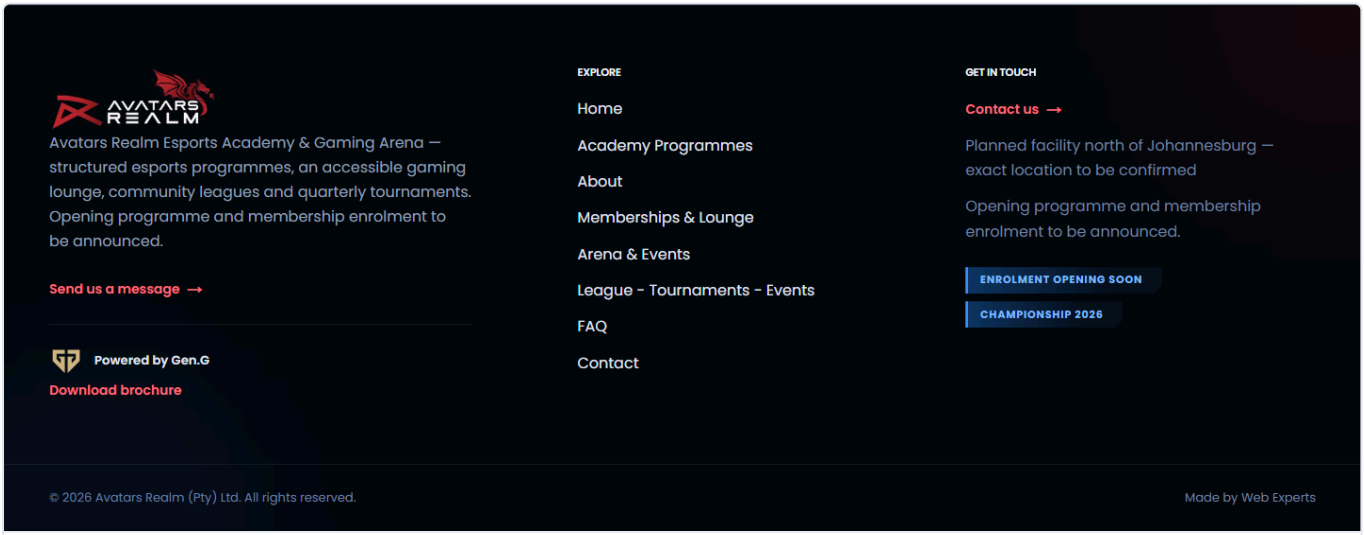

SITE-WIDE · CHANGE 7

7 Every general contact button now opens the form

PAGE	CHANGE
Home	“Contact us” in the closing CTA opens the form.
About	Hero “Email the team” replaced with a contact button; closing CTA updated.
Academy Programmes	“Join the league” opens the form with the league subject.
Memberships	“Register interest in …” per tier and the school-group enquiry open the form.
Arena & Events	“Register your interest” opens the form; no email link remains.
League – Tournaments – Events	“Register your interest”, “Follow quarterly announcements” and the event CTA open the form.
FAQ	“Ask a question” opens the form.
Footer	Email address and phone number removed; “Contact us” opens the form.

Removed

- `mailto:` links and the published info@avatarsrealm.co.za address throughout the site.
- All `tel:` links and the +27 84 906 7711 number.
- “Email the team” and “Call” button labels in copy and content data.

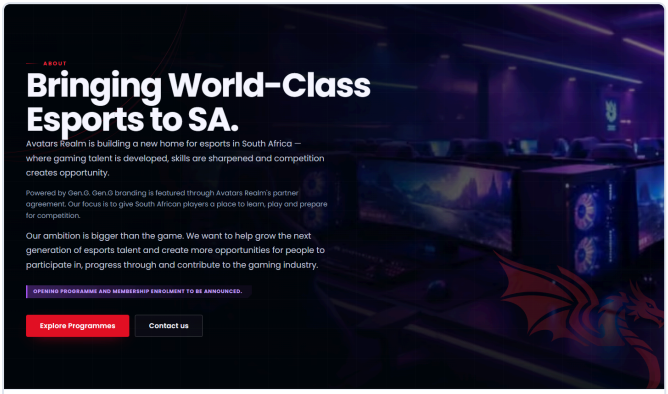

Footer: email address and phone number removed; contact now goes through the form.

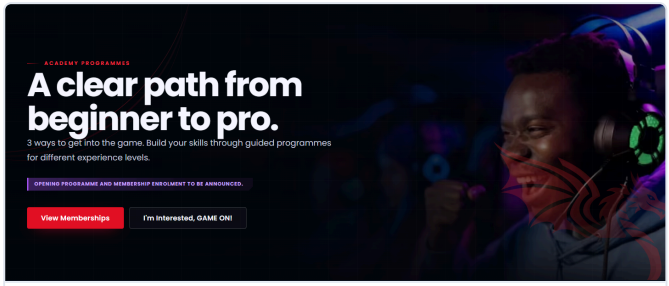

INNER PAGES · CHANGE 8

8 About and Academy

Every page was loaded and checked after the change. The screenshots below show the updated state.

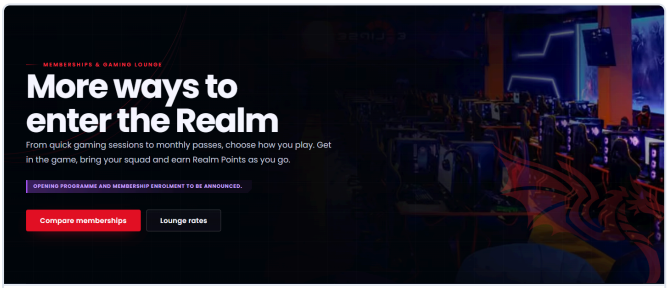

About — hero contact button opens the form.

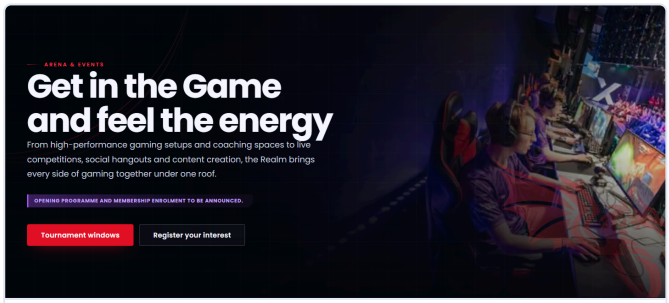

Academy Programmes — programmes and league entry.

Academy — the smaller Gen.G lockup under the page heading.

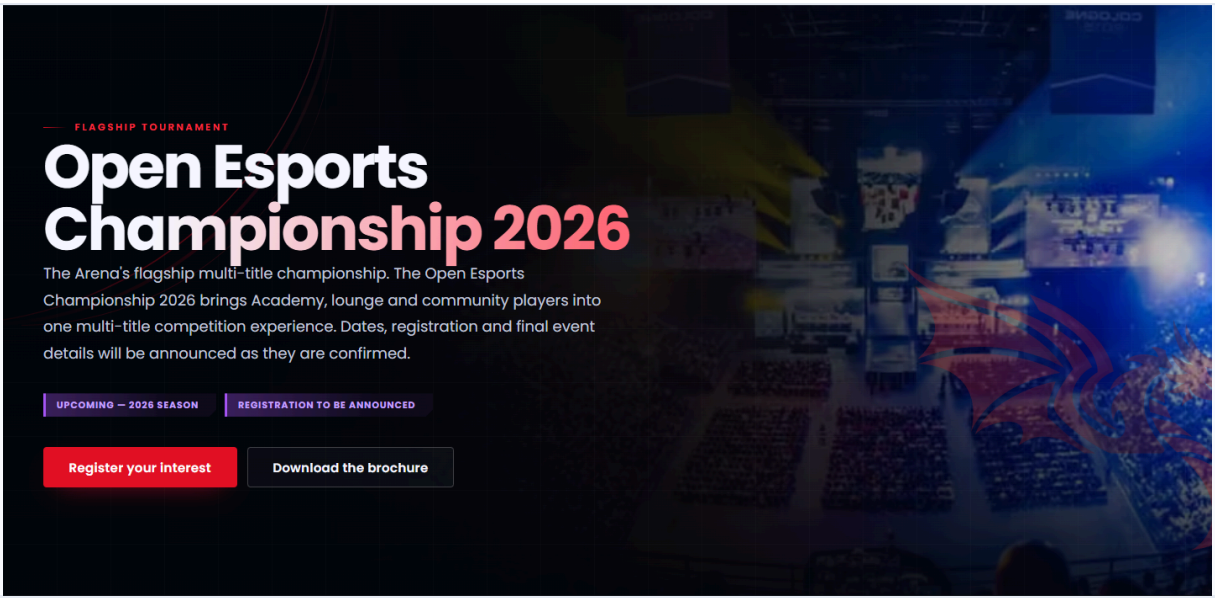

Memberships — tier cards open the contact form.

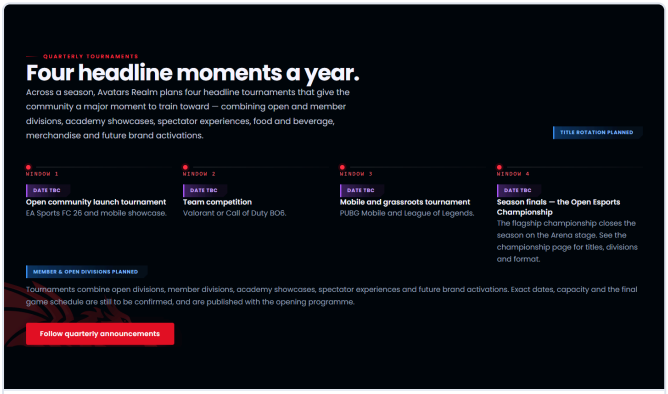

Arena & Events — register-interest opens the form.

INNER PAGES · CHANGE 9

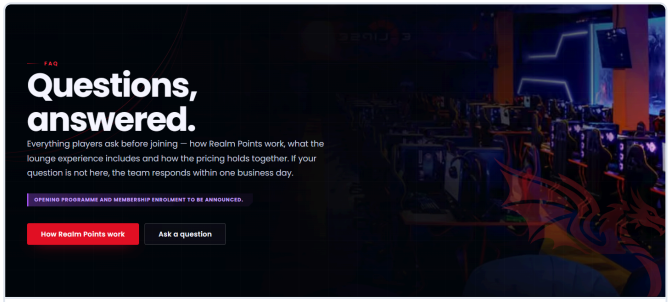

9 League and FAQ

League – Tournaments – Events — register-interest opens the form.

Quarterly tournaments section.

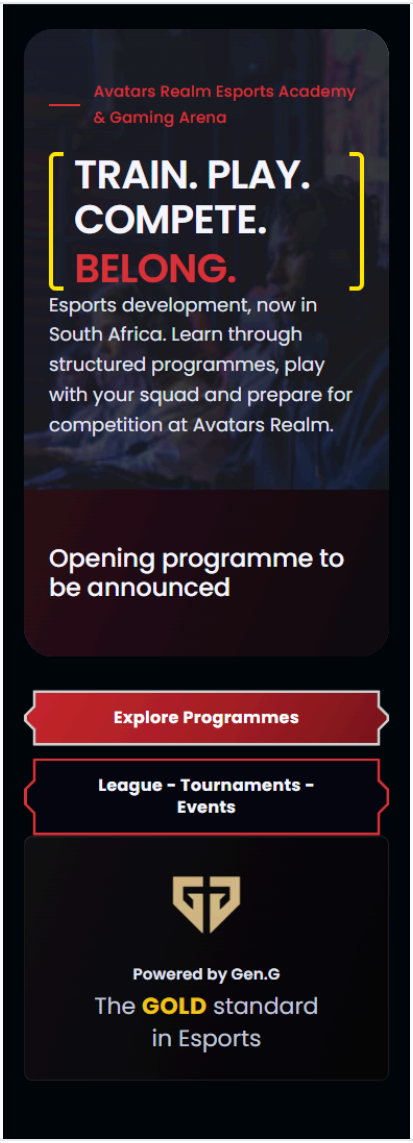

FAQ — “Ask a question” opens the form.

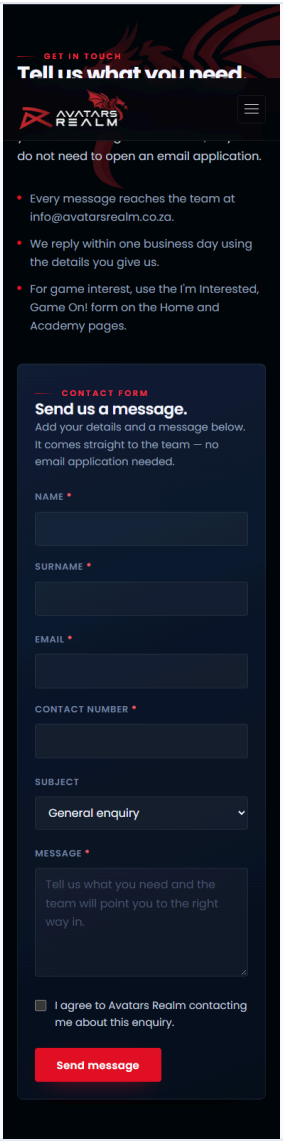

RESPONSIVE · CHANGE 10

10 Mobile check

The hero, Gen.G band and contact form were checked at 390 × 844 to confirm they stack cleanly on a phone.

Mobile hero with brackets.

Mobile contact form.

FOR THE DEVELOPMENT TEAM · CHANGE 11

11 Technical summary

New files

FILE	PURPOSE
`components/ContactForm.tsx`	General contact form — dialog and inline variants.
`app/api/contact/route.ts`	Server validation, honeypot, rate limit and delivery to info@avatarsrealm.co.za.

Modified files

app/page.tsx · app/contact/page.tsx · app/about/page.tsx · app/academy-programmes/page.tsx · app/memberships/page.tsx · app/arena-events/page.tsx · app/open-esports-championship-2026/page.tsx · app/faq/page.tsx · app/globals.css · app/layout.tsx · components/Hero.tsx · components/GenGLockup.tsx · components/CtaBand.tsx · components/Footer.tsx · components/InterestForm.tsx · lib/site.ts · lib/content.ts

Commits on `update-02`

COMMIT	MESSAGE
`f526c77`	General contact form, remove phone numbers, enlarge Gen.G hero band
`7cd2888`	Match PDF reference: bright yellow hero brackets and larger Gen.G lockup
`0ecdf69`	Render contact and interest modals through a portal above page content

Configuration

- `WEB3FORMS_ACCESS_KEY` must be set in the hosting environment — it already exists for the interest form.
- If it is missing, the contact route returns a friendly “temporarily unavailable” message and logs the reason; no enquiry is silently lost.

Before publishing

Open the Vercel preview for the `update-02` branch, submit one test enquiry, and confirm the message arrives at info@avatarsrealm.co.za. Then merge to the production branch when the team is ready.

OPEN ITEMS · CHANGE 12

12 Notes and open items

- The live production URL still shows the old build — see the deployment note on page 2.
- The Home championship eyebrow still reads “Open Esports Championship 2026”, as supplied.
- The League page hero keeps its original wording; the navigation label changed to “League – Tournaments – Events”.
- The membership heading typo (“Level up y& get rewarded”) was normalised to “Level up & get rewarded”.
- Academy closing enrolment block was removed per the marked copy.
- Content the document left marked “to confirm” is still published as proposed pilot pricing and indicative dates.

The branch is pushed and ready for review. Nothing has been merged into production.
