Avatars Realm Website Update — Revised Change Summary

Review context: Updated website reviewed at `https://avatars-realm.vercel.app/`
Purpose: Record the new website changes following the original website modification brief, including the revised Academy pricing approach.

This document is a change summary only. It is not a replacement for the full website development specification.

1. Positioning change

The website now presents Avatars Realm as a connected:

- Esports Academy
- Gaming Lounge
- Arena and event destination

The central message has shifted to:

> ***Train. Play. Compete. Belong.***

The site now communicates a complete player journey: a visitor can start with casual lounge play, enter a structured programme, earn rewards, join league competition and progress toward tournaments.

2. Revised Academy programme and pricing model

The Academy should no longer present large total course prices as the primary message. The revised approach is to show accessible monthly fees and longer programme commitments.

This is intended to reduce the initial price barrier, create demand in the South African market and encourage participants to continue through the next programme level.

Proposed pilot programme structure

Programme	Proposed duration	Proposed monthly fee	Programme approach
Beginner	3 months	**R1,500 per month**	A low-barrier entry pathway, beginning with a four-week foundation phase and continuing through performance-based development assessments.
Intermediate	6 months	**R2,200 per month**	A structured development pathway focused on match performance, role development, review and preparation for league participation.

Pro	12 months	**R1,800 per month**	A longer-term performance pathway with disciplined training, ongoing assessments, advanced feedback and organised competition preparation.

These are proposed pilot fees, not final binding prices.

The Beginner programme should be described as a three-month pathway rather than a once-off four-week course. The first four weeks establish fundamentals; further assessments then determine progression, support requirements and readiness for Intermediate-level training.

The monthly pricing structure is intended to keep entry accessible while encouraging longer-term progression:

- Beginner is priced at R1,500 per month to lower the barrier for new participants and create demand.
- Intermediate carries a higher monthly fee because it provides more intensive development, structured review and preparation for league participation.
- Pro is priced at approximately R1,800 per month in exchange for a longer twelve-month commitment and sustained performance training.

The website should display the monthly fee prominently and avoid leading with the full projected programme total. Full commitment periods and programme terms should remain visible in the supporting information.

Suggested website wording

> ***Beginner Programme — R1,500 per month***
> *A three-month foundation pathway for new and developing players. Start with the fundamentals, receive regular feedback and complete performance assessments that guide your next step.*

> ***Intermediate Programme — R2,200 per month***
> *A six-month development pathway for players ready to turn practice into reliable match performance and prepare for league competition.*

> ***Pro Programme — R1,800 per month***
> *A twelve-month performance pathway for committed players seeking disciplined training, advanced review and sustained competition preparation.*

3. Membership and gaming lounge changes

A new Memberships & Gaming Lounge proposition has been added to the website.

The updated content now includes:

- Hourly lounge access
- Prepaid gaming packs
- Monthly memberships
- Booking priority
- Coaching benefits on selected membership tiers

- Member access to league and tournament benefits

The displayed proposed access pricing includes:

- R40 student or school-hour rate
- R50 off-peak rate
- R70 peak rate
- R225 five-hour prepaid pack
- R400 ten-hour prepaid pack

The displayed monthly membership examples include:

- Social Pass — R399 per month
- Competitive Pass — R899 per month
- Pro Pathway — R1,999 per month
- Institution / School — R12,500 per term

These figures remain illustrative pilot pricing until the opening programme, capacity and operating costs are confirmed.

4. Realm Points and rewards changes

The website now introduces Realm Points / XP as a proposed loyalty and participation system.

The updated content explains that players may earn points through:

- Paid gaming hours
- Coaching sessions
- League matches
- Quarterly tournaments
- Community sessions
- Approved learning activities

The proposed benefits include:

- Booking priority
- Guest passes
- Food and drink discounts
- Merchandise discounts
- Coaching credits
- Tournament discounts
- Recognition and badges

The site correctly states that points are intended to reward loyalty and participation, not create an in-game competitive advantage.

Manufacturer and production-company benefits are described as future or partner-enabled features rather than confirmed benefits.

5. Arena and venue changes

The website now presents the Arena as a complete gaming experience centre rather than only a room containing PCs.

The proposed Arena zones shown on the site include:

- PC Gaming Zone
- Academy Rooms
- Arena / Competition Stage
- Social Lounge
- Streaming and Content Corner
- Food and Beverage
- Future Merchandise / Partner Zone

The Arena is now connected to:

- Academy coaching
- Lounge play
- League matches
- Watch parties
- Quarterly tournaments
- Spectator experiences
- Event hosting

Some venue features are still described as future-ready or subject to the opening programme.

6. League and tournament changes

The updated website now includes a recurring competition structure.

Community League

The League content introduces:

- Recurring league windows
- Social, Competitive and Pro divisions
- Published standings and rules
- Realm Points for participation and performance
- Seasonal finals or Arena showcase matches
- Rotation across selected game titles

Quarterly tournaments

The site now presents four headline tournament windows across the year, including:

- An open community launch tournament
- A team competition
- A mobile and grassroots tournament
- Year-end championship finals

The exact dates, capacity and final game schedule remain subject to confirmation.

7. Open Esports Championship 2026 changes

The Open Esports Championship is now positioned as the Arena's flagship named event.

The updated site presents it as:

- A multi-title competition
- Open to Academy, lounge and community players
- Part of the wider league and tournament programme
- A future Arena-stage experience with spectators and commentary

The Championship page now includes a **"How It Fits"** section. This section explains that the Championship is the flagship event, but not the entire Avatars Realm proposition.

The website also displays:

- Five proposed competition titles
- Open and member divisions
- A proposed tournament journey
- A proposed two-day format
- An indicative prize pool of R90,000, subject to confirmation

The two-day format, final divisions, dates, registration process and prize pool should remain labelled as planned or subject to confirmation until approved.

8. Partnerships wording

The updated website does not claim that partners have already been secured.

Partnership opportunities are described as:

> ***Under establishment***

The site identifies possible future areas such as:

- Gaming hardware and peripherals
- Production and broadcast

- Food and beverage
- Data and performance technology
- Education and institutions
- Apparel and merchandise

No partner logos or confirmed partnership claims are published.

9. Contact and basic website scope

The updated website remains a basic informational website.

It includes:

- Email contact
- Telephone contact
- Venue location
- Programme and membership enquiry routes
- Partnership enquiry information

It does not require:

- Online payments
- Membership account integrations
- Booking-system integrations
- CRM integrations
- Advanced SEO implementation
- Automated registration workflows

Visitors are directed to contact the team while the opening programme and final operating details are being confirmed.

10. Follow-up copy refinements identified after the update

The website update has implemented the intended business direction, but the following refinements are still recommended:

- Replace the current large total Academy prices with the proposed monthly-fee presentation.
- Show the Beginner programme as a three-month pathway at R1,500 per month, with a four-week foundation phase and further performance assessments.
- Show Intermediate as a six-month pathway at R2,200 per month.
- Show Pro as a twelve-month pathway at R1,800 per month.
- Avoid presenting the full programme totals as the main price message.
- Keep all Academy fees labelled as proposed pilot pricing until confirmed.
- Reduce repeated explanations of the same Academy–Lounge–Arena journey.
- Shorten the homepage and keep deeper explanations on the relevant inner pages.
- Use one consistent description of League frequency: weekly, monthly or seasonal.

- Make the 2026 event calendar current, since some quarterly windows may already have passed.
- Keep the two-day format and member/open divisions marked as planned until operationally approved.
- Keep Realm Points earning and redemption rules labelled as proposed until finalised.
- Ensure “pre-launch” wording is consistent with any statement suggesting that venue zones are already open.

Summary

The updated website now reflects the intended commercial proposition: Avatars Realm is presented as an Academy, gaming lounge and Arena ecosystem with structured programmes, memberships, rewards, leagues, tournaments and a flagship Championship.

The latest pricing change strengthens that proposition by making the Academy more accessible: the Beginner pathway is now positioned at R1,500 per month over three months, with a four-week foundation phase and further assessments guiding progression into longer Intermediate and Pro programmes.

The remaining work is primarily copy simplification, pricing presentation, consistency checking and confirmation of operational details—not a change to the overall design direction.
